

3. iconography

pure finish

The celebration of the entrance to the downtown area is accomplished with two large pillars placed on both sides of the street. An icon on the top of each pillar represents part of the Downtown Renton—its past and present. Pedestrians can learn more about the subject by reading the historic and interpretive information displayed in panels, artwork, and artifacts in an exhibit at the bottom of the pillar.

The icon/topics are listed below. Each will be further developed into a three-dimensional shape in either pure metal finishes (top three rows), or color-coordinated painted shapes (bottom three rows).

subjects

blue heron
native canoe
cedar tree
mining
theatre
music
boating
fishing
farmer's market
biking
